Teen Safe Driving Campaign Survey

How to conduct a Distracted Driving Written Survey:

Choosing participants – Select students in Junior and Senior classes because they are old enough to qualify for Learner’s Permit or they may be licensed drivers.

Collecting data – There are two forms per page and each student participating in the survey will fill out one form. A student or a teacher can distribute the survey form and ask teens to complete the three sections. Let teens know that it is an anonymous survey. Have two students stand inside the door to collect the surveys as teens exit the classroom.

How to calculate survey results:

Total drivers surveyed – Throw away incomplete survey forms and forms for teens that circled “Do Not Drive”. The total number includes teens that are driving.

Distracted drivers – Total data from survey forms with circles around 2, 3 or 4 for the distracted driver behaviors and calculate the percentages.

Pre-Campaign Data	Number	Percentage
Total drivers surveyed		100 %
Distracted drivers texting		%
Distracted drivers using cell phones		%
Distracted drivers other		%
Total distracted drivers		%

Baseline - ____ Percentage of distracted driving behaviors in pre-campaign survey

Post-Campaign Data Results	Number	Percentage
Total drivers surveyed		100 %
Distracted drivers texting		%
Distracted drivers using cell phones		%
Distracted drivers other		%
Total distracted drivers		%

Results - _____ Percentage of distracted driving behaviors in post-campaign survey

Measurable Impact of Teen Safe Driving Campaign - _____ Percentage change (+/-) in unsafe driving behaviors according to results from the Safe Driving Campaign surveys.
